Diamond

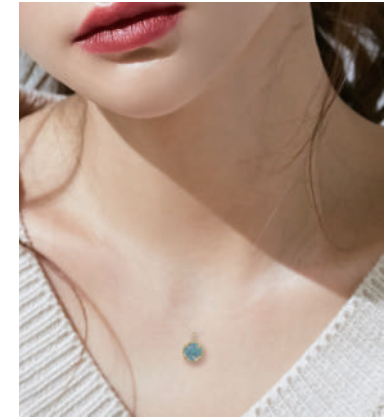

A new type of Dancing Stone that makes use of the birefringence of quartz. This jewelry allows the colors of the colored stones to shine through clearly, and greatly enhances their beautiful sparkle.

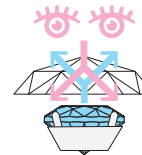

A rose-cut quartz with birefringence is used as a cover on top of the dancing stone.

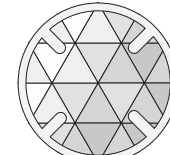

The color of the colored stones and their sparkle are reflected throughout the quartz, creating a fantastic atmosphere.

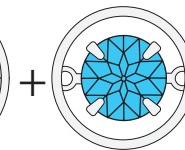

By utilizing the birefringence of quartz and allowing it to pass through, the brilliance of the dancing stone and the color of the colored stone can be greatly enhanced.

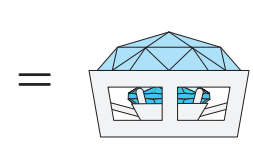

One beam of light splits into two through quartz (birefringence)

7mm rose-cut quartz

4mm Dancing Stone (color stone)

The colors and brilliance of the colored stones spread through the quartz.

[Available metals]

24K, 18K, 14K, 10K, Pt, SV

[Usable gemstones]

All 4mm gemstones (round cut)

※We may not be able to accommodate special shapes.
